

Where state and county, and/or MCD boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

State and county names are followed by their FIPS code.

- 1 MCDs are symbolized and labeled only in the 12 strong MCD states: Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin.
- 2 Incorporated place name color corresponds to the incorporated place fill color.
- 3 The full census tract code consists of six digits with an implied decimal point between the fourth and fifth digits. For legibility on this map, the leading zero(s) have been stripped and the decimal point is shown. To translate a census tract number into the full code, add the number of leading zero(s) needed to the left side of the number to reach six total digits and remove the decimal point between the last two digits.

Example: Census tract number on the map "33.07" represents census tract 033070.

Due to space limitations, some road names, along with other feature and geography names on the map, may not be shown.

The plotted map scale is 1:50,000

Projection: Albers Equal Area Conic  
Datum: NAD 83  
Spheroid: GRS 80  
1st Standard Parallel: 40 53 46  
2nd Standard Parallel: 42 58 46  
Central Meridian: -93 23 22
